

TestCase

```
classDiagram
    class TestCase
    class TestSurfaceClass["medpy.tests.filter.AnisotropicDiffusion.TestSurfaceClass"]
    TestSurfaceClass --|> TestCase
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'TestCase'. Below it is a larger, shaded box labeled 'medpy.tests.filter.AnisotropicDiffusion.TestSurfaceClass'. A blue arrow points from the shaded box up to the 'TestCase' box, indicating that 'TestSurfaceClass' inherits from 'TestCase'.

medpy.tests.filter.AnisotropicDiffusion.TestSurfaceClass
